BOOK GETTING STARTED

ACCOUNT, SETTINGS & PROFILE

Every setting explained — language, flag, name, e-mail, password and privacy — how to delete your account, and what a citizen's profile shows.

UPDATED 2026-10-09

SETTINGS

Settings lives in the gear menu of your header, next to **My Profile**. The page has four tabs: **Preferences**, **Identity**, **Security** and **Moderation**.

PREFERENCES

- **Sound effects** — quiet ticks and chimes for actions, menus and celebrations. On or off; the choice is remembered on this device.
- **Language** — six languages: English, Türkçe, Deutsch, Español, Português and Bahasa Indonesia. The game switches at once, and the choice follows your account to every device. At sign-up it is pre-selected from your country.
- **Tutorial** — shown once your Chronicle is closed: **Restore tutorial** brings back a skipped Chronicle without paying any act twice (see First Steps — the Chronicle).

IDENTITY

- **Profile photo** — upload a picture and crop it. It is worn on your portrait and your profile.
- **Biography** — up to **1,000 characters**; it opens your profile.
- **Real-world country** — a small flag on your profile, completely separate from your in-game citizenship. Until you choose it yourself it follows the country you connect from. Choosing it — at sign-up or here — **locks it for 90 days**.
- **Change name** — costs **50 gold**. The new name needs **3–24 characters**, English letters, digits and underscores only, and must not belong to anyone else. The gold is taken only when the change goes

through.

- **Party flag on my name** — while you are in a party, its tag (for example [ABC]) shows before your name everywhere. Turn it off to appear without party colours.
- **Hide my premium expiry date** — while you have Premium: your Premium badge stays on your profile, only the date is hidden.

SECURITY

- **Change email** — two steps. Enter the new address and your current password, then press **Send verification code**. The code goes to your **current** inbox, not the new one, and works for **10 minutes**. Enter the 6-digit code and press **Verify & update email**. The new address must not belong to another account, tagged addresses (name+tag@example.com) are refused, and an inbox that already holds an account cannot take a second one.
- **Change password** — your current password, then the new one twice. A password needs at least **8 characters**.
- **Delete my account** — see below.

Forgot your password? **Forgot password?** on the login page e-mails a reset link to your address; the link works for **1 hour**.

MODERATION

Your **active penalties**, each with the time it has left, and your **record** of past ones. From here you can open the **Record** page and **appeal a penalty** through the help desk. How penalties and appeals work is on Community Rules & Moderation.

SIGNING IN

You sign in with your e-mail and password. A sign-in lasts **seven days** on each device and renews itself while you play, so an active player is never signed out; after seven days away the game says your session has ended and you log in again. You may be signed in on several devices at once.

DELETING YOUR ACCOUNT

Settings → Security → Delete my account asks for the account to be deleted.

1. A window lists what goes with it: your character, companies, newspaper, messages and purchases. **Premium days and purchases are not refunded.**
2. Confirm with your **e-mail and password** and press **Request deletion**.
3. The next window names the **day** the account will be deleted, and you are signed out — on this device and on every other one that was signed in. An e-mail confirms the date.

Changed your mind? Just sign in. Signing in at any time before that day **cancels the request**, and a notification says so.

If you stay away, the account falls inactive after **15 days** like any other account — it leaves its party, its job and its offices (see Citizenship & the World Map) — and is then **erased for good**, with everything it owns.

Staff accounts cannot use this button.

YOUR PROFILE

Every name in the game opens that citizen's profile — the **Citizen dossier**. Yours is under **My Profile**. Balances are never shown on a profile.

THE IDENTITY CARD

- The **portrait** with the citizen's level; click it to see the photo.
- **Presence**: a teal dot and *online* when they were active in the last 5 minutes, otherwise when they were last online. An *Inactive* chip marks an account that has fallen inactive.
- **Honours** under the name: a Patron or Founder tag, Premium, a staff rank, **President** or **Leader** of their country, and each ministry they hold with the country that appointed them.
- **Actions** on someone else's profile: **Send message**, **Offer a contract** (see Contracts) and the flag button to **report** the player. On your own profile, **Edit profile** opens Settings → Identity, and the **+** on your portrait uploads a new photo.
- The **ledger**: citizenship (or *Stateless citizen*), home region, current location, party with their role — the history button opens their **party history** — employer, and the day they joined.
- Their **real-world flag** sits in the dossier's title bar.

THE DOSSIER

- **Biography** — the citizen's own words.
- **Attributes** — Strength, Education and Economy.

- **Front record** — damage dealt, hits, wars fought and weapons fired.
- **Work record** — goods produced, shifts worked, companies and articles.
- **Latest articles** (with their newspaper) and **Companies** — the three newest articles and the three highest-level companies; **See all** opens the full list as a searchable, sortable table.

If you are the **president** of that citizen's country, a **Cabinet** panel appears on their profile: appoint them as Economy, Foreign, Interior or Defense Minister, or dismiss them. Appointing a role replaces its current holder (see Government Offices & Elections).

MEDALS & HONOURS

The medal shelf shows only medals that were earned — hover or tap one for its story.

MEDAL	COLOUR	WHO WEARS IT
Closed Beta Player	teal	every account created before the open beta, **10 October 2026, 17:00 UTC**
Supporter / Patron / Founder	emerald / gold / purple	holders of the closed-beta memberships, for life
Premium	gold	while Premium is active; it shows the end date unless hidden
Developer / Admin / Moderator / Ambassador	orange / red / blue / green	the game's staff
Journalist of the Week ×N	ivory	each weekly win as the best-read author
Newspaper of the Week ×N	ivory	each weekly win of the newspaper they own

The ×N counts how many times the award was won (see The Press).

BLOCKING SOMEONE

Blocking lives in **Messages**: open your conversation with the player and press **Block DMs**. You stop receiving their messages, and older ones stay readable. **Unblock** lets them write to you again.
