SHOP & PREMIUM

What Premium gives and costs, gold packs and bundles, gifting, the free ways to Premium, and the full Auto Mode rules.

UPDATED 2026-10-10

THE TREASURY SHOP

The **Shop** — its own tab in the header — sells three things for real money: **Premium** time, **gold** and **bundles** of both. Prices are in **US dollars**.

- Checkout runs through **Polar**, the merchant of record — cards, wallets and local payment methods. Polar e-mails you the receipt.
- Delivery is **instant**: the goods land the moment the payment settles, and a pop-up tells you what arrived. While one payment is still settling, the shop asks you to wait before starting the next.
- The shop's hero shows **your treasury**: your gold and the date your Premium runs until.

WHAT PREMIUM GIVES

Premium is comfort, not power. The full list:

- **Auto Mode** — your shifts or strikes run on their own for 24 hours at a time (rules below).
- **Double daily rewards** — each daily mission pays **20 gold** and the all-three bonus **20 gold**, and the supply drop **20 gold + 100 local currency**; without Premium they pay half (see Daily Systems).
- **20 contracts a day** instead of 10 (see Contracts).
- **20 bread a day** instead of 10 — more food, so more energy per day.
- **Faster training** — training takes **10% less time**. The cut is added to your other training cuts (your city's Education index, Liberalism, a Field Academy) rather than multiplied with them (see Leveling & Training).

- **A convoy slot** on top of the ones your level opens, at any level — the only way to run all four field structures at once (see The Convoy System).
- **Premium flair** — your name in Premium gold with a gem in chat, a Premium chip in your header, and a Premium badge and medal on your profile.

Premium never touches damage, production, wages or prices.

PLANS

PLAN	PRICE	PER MONTH
1 month	**$3**	$3.00
3 months	**$8**	$2.67
6 months	**$15**	$2.50
12 months	**$24**	$2.00

HOW PREMIUM TIME ADDS UP

- Every plan **stacks**: new months are added to the end of the Premium you already have.
- If your Premium has run out, the new time **starts from the moment of delivery**.
- When Premium ends, its perks stop: the bread limit is 10 again, new trainings take the normal time and Auto Mode can no longer be started. A structure already standing in the Premium convoy slot keeps running, but no new site can open in it.
- Your profile shows the date your Premium runs until. To keep the date private, turn on **Hide my premium expiry date** in Settings → Identity — the badge stays, only the date disappears.

PREMIUM WITHOUT PAYING

- **Referrals** — qualified referrals unlock Premium on the referral ladder: **1 week** at 3, **2 weeks** at 5, **1 month** at 10, **3 months** at 25 and **6 months** at 50 (see Daily Systems).
- **Live events** — an event can pay Premium days to everyone who took part (see Live Events).
- **Staff gifts** — gifts sent by the game's staff can include Premium days.
- **Staff pay** — Ambassadors and Moderators receive one day of Premium with their daily pay.

Free Premium stacks exactly like bought Premium.

GOLD

Gold is the world's common coin: it pays for training, companies, the global market and much more. Bigger packs carry bigger bonuses — up to **30%** extra.

PACK	BONUS	YOU RECEIVE	PRICE
500 gold	—	500	**$3**
1,000 gold	+100	1,100	**$5**
2,000 gold	+250	2,250	**$10**
5,000 gold	+750	5,750	**$25**
10,000 gold	+1,750	11,750	**$50**
20,000 gold	+4,000	24,000	**$100**
50,000 gold	+12,500	62,500	**$250**
100,000 gold	+30,000	130,000	**$500**

Each card shows how much gold one dollar buys.

BUNDLES

A bundle is Premium and gold in one purchase, for less than buying them apart.

BUNDLE	PREMIUM	GOLD	PRICE	BOUGHT APART
Starter Pack	1 month	1,000 + 100 bonus	**$7**	$8
Deluxe Pack	6 months	5,000 + 750 bonus	**$35**	$40
Ultimate Pack	12 months	20,000 + 4,000 bonus	**$99**	$124

The Premium in a bundle stacks like any plan.

GIFTING

Every product can be a gift. Each buy button has a small gift button beside it:

1. Type at least **2 letters** of a player's name and pick them from the list.
2. Add a note if you like — up to **200 characters**.
3. Press **Continue**: a confirmation names the product, its price and the recipient. **Yes — to payment** opens the checkout.

The goods go **straight to the recipient** — gold into their vault, Premium onto their time. They get a notification and a **You received a gift!** pop-up with your name and your note; your own pop-up confirms who received it. You cannot gift a purchase to yourself.

CLOSED-BETA MEMBERSHIPS

The **Supporter**, **Patron** and **Founder** memberships of the closed beta are no longer sold. Their holders keep the honours for life: the membership medal on the profile (Supporter emerald, Patron gold, Founder purple) and, for Patron and Founder, a tag beside the name.

AUTO MODE

Auto Mode is the Premium half of the work and strike buttons. It runs your **work shifts** or your **war strikes** for you, for **24 hours** at a time. It never changes a formula: every action it takes is the same shift or strike you would make by hand, with the same output, wage, damage and XP — it just does not need you to be there.

WHERE TO START IT

The narrow **Auto** segment sits beside the work button — on the dashboard, on the job board, and on your own company's page when you work there — and beside the strike button on a war page. Without Premium it shows a lock.

- **Auto work** runs work shifts.
- **Auto attack** runs strikes on one war.

One session at a time. Working and fighting drink from the same energy, so a second session cannot start until you stop the first.

THE TWO MODES

- **Functional** — acts only when your energy bar is **full**, then spends it. It never touches your energy drinks.

- **Ruthless** — drains everything. Whenever energy is missing and the 10-minute drink cooldown allows, it uses energy drinks **from your stock** to fill the bar, then acts; between drinks it acts on whatever energy comes back. Before it starts, a confirmation tells you how many drinks you hold. When the stock runs out, it carries on with your regenerating energy.

Drinks are not bought automatically — Ruthless only uses drinks you already own (buy them on your Inventory page). A session acts about once a minute.

WHAT A SESSION NEEDS TO START

- **Premium** must be active.
- **Auto work**: you must have a job and stand in your company's region.
- **Auto attack**: the war must still be running, you must stand in the attacking or the defending region, and you pick a weapon tier and need at least one strike's worth of weapons of that tier. In a naval landing you pick a ship tier instead, and the session fights the landing only.

WHY A SESSION STOPS

A session ends when:

- the **24 hours** are over;
- you **stop it** yourself;
- the **war ended**;
- you **ran out of weapons** — or of **ships** in a landing;
- the **landing ended** (start a new session for the assault);
- you **left the front**;
- you are **no longer employed**;
- you **left the work region**, or lost the right to work there;
- the **factory ran out of raw materials**;
- your **storage for this product is full** — when you are paid a share of the goods;
- your **Premium ended**;
- your **employer can't pay** your wage.

It does **not** stop for a lack of energy, a drink cooldown or a flight: it simply waits for the next minute.

NOTICES

- When a session starts: *Auto mode armed — auto work (or auto attack) will run for the next 24 hours.*

- When it stops by itself before the 24 hours are up: the reason from the list above.
- When the 24 hours end: a summary of the **runs**, the **damage** dealt and the **drinks** used.

The energy Auto Mode spends counts toward the daily **Spend energy** mission, and every drink it uses counts toward the energy-drink mission, exactly as if you had pressed the buttons yourself.
