THE CONVOY SYSTEM

Your personal support column — four field structures, delivery-based construction, levels 1–10, and the slots that unlock as you grow.

UPDATED 2026-10-09

WHAT A CONVOY IS

Regions have infrastructure; **you** have a convoy. Its structures travel with you, so their bonuses apply wherever you are. Each of its four field structures mirrors one regional index at roughly **40% strength** — personal kit matters, but developed regions and wars always matter more:

STRUCTURE	MIRRORS	MAX BONUS (LEVEL 10)
Field Hospital	Health	**+20%** passive energy regen
Field Academy	Education	**−10%** training time
Mobile Workshop	Industry	**+10%** work output
Forward Command	Military	**+8%** war damage

Bonuses scale linearly: a level-5 Field Hospital gives +10% regen.

A convoy bonus is **added** to the bonus of the region you are in — a level-10 Field Hospital adds 20 points to whatever regen boost the region gives — and is never multiplied by it. The crown of the three top-ranked cities never multiplies a convoy bonus either.

BUILDING ONE

Open the convoy page from the dashboard (**Manage convoy**), pick a structure and a level from **1 to 10**, and **Open construction site**. The flat fee of **5 gold per level** is charged when the site opens.

The site is then fed from your inventory with **Deliver from storage**, in installments: any of the raws, in any amounts, whenever you like. A delivery never goes past what the bill still needs, and delivered materials are locked into the site. All seven raws are on every bill, with a signature raw carrying about half of it. The bill at level 1 is below; every level multiplies it, so a level-10 site needs ten times these amounts.

STRUCTURE	GRAIN	COTTON	TIMBER	IRON	COAL	COPPER	OIL
Field Hospital	4	**14**	4	2	2	2	2
Field Academy	4	4	**14**	2	2	2	2
Mobile Workshop	2	1	4	4	**14**	3	2
Forward Command	2	2	2	4	2	**14**	3

When every line of the bill is delivered, the structure stands and its bonus starts at once. You can carry **one structure of each kind** at a time.

LIFETIME

- A construction site has **7 days** from opening to be finished. A site still unfinished then disappears, and the delivered materials and the fee are lost.
- A finished structure runs for **7 days** from the moment it is completed, no maintenance — then it collapses and the slot frees up. From opening the site to the end of the structure, one cycle can last up to about 14 days.
- You can **Cancel site** or **Demolish** a structure at any time. Nothing is refunded, and the slot is free at once.

Convoys are a rhythm, not a monument: veterans rebuild theirs weekly as part of the economy.

SLOTS

- Level **25** unlocks your first slot, level **50** the second, level **100** the third.
- **Premium adds a fourth slot** at any level — the only way to run all four structures at once.
- An open construction site already takes its slot.
- Slots gate only **new** sites. A structure already standing — or a site already open — survives a Premium lapse or any recount.

TIP

The Field Hospital is the usual first build: +20% regen adds to your region's Health bonus and pays for itself in extra shifts. Fighters swap to Forward Command in war weeks.
